ABOUT

I'm a **Product Owner** at **dti digital**, currently on a sustainment project for **SURA**, an insurance company whose product is already live. Before product, I spent 2 years in quality at dti: QA engineer, then **Lead QA Engineer** on **8 global applications for ADI Global Distribution** and on the **AI-assisted QA initiative** of the ISN project. That shapes how I work as a PO: I've seen where products break, and most of the time it isn't in the code, it's in a story nobody could verify or an acceptance criterion three people read three different ways. That is why **quality is part of how I prioritize**, not a phase at the end. I work with US clients.

PROFESSIONAL EXPERIENCE

dti digital — **Belo Horizonte, Brazil**
Product Owner – SURA Project — *10/2026 – Present*

- PO on a sustainment project for SURA (insurance), with the product already live.
- Prioritizing with the client a backlog of incidents, fixes and improvements competing for the same sprint.
- Making sure every story that enters the sprint has clear acceptance criteria and can actually be tested.

dti digital — **Belo Horizonte, Brazil**
Lead QA Engineer – ADI Global and ISN Projects — *09/2025 – 10/2026*

- Led quality across **8 global applications for ADI Global Distribution**, including the ADI mobile app, leading Quality Engineers and working directly with the client.
- Implemented **Shift Left** in the development process: **75% fewer bugs** created during development and **95% fewer bugs** found by the client.
- Back-end, front-end and performance testing; test automation integrated with CI/CD pipelines; OKR definition, QA metrics analysis and process improvement.
- On the ISN project, led an **AI-assisted QA initiative** (dti's AI-first pilot), structuring and orchestrating AI agents to test, prioritize defects and support quality decisions.

dti digital — **Belo Horizonte, Brazil**
Junior QA Engineer — *07/2024 – 09/2025*

- Test case writing and implementation of automation flows.
- API testing – Swagger, Postman, ReadyAPI.
- Mobile front-end testing – Maestro, Appium; web front-end testing – Selenium, Cypress, Playwright.

dti digital — **Belo Horizonte, Brazil**
Software Developer Intern – Backend — *05/2024 – 07/2024*

- API structuring and implementation, database integration and performance optimization.

PROJECTS AND PUBLICATIONS

AdvoFind — **Web, Android and iOS**
Personal project – concept, build and launch

- Legal-services app connecting people who need legal guidance with qualified lawyers and law firms.
- Started with **discovery**: interviews with lawyers and clients to understand the main barriers to accessing legal services.

Scientific publication — **SBCUP 2026 (CSBC 2026)**
Co-author of a published paper

- "Dispositivo Vestível de Emergência com Comunicação Autônoma GSM e Canal Redundante via Bluetooth" (Wearable Emergency Device with Autonomous GSM Communication and Redundant Bluetooth Channel).

EDUCATION

PUC Minas — **Belo Horizonte, Brazil**
Software Engineering — *Expected graduation: 12/2027*

SKILLS AND TOOLS

Languages: English (Advanced), Portuguese (Native), Spanish (Beginner), French (Beginner)
