ABOUT

My name is Marcos Paulo, and I currently work as **QA Lead** at **dti digital**, assigned to the **ISN** project, where I lead the **AI initiative of dti's AI-first pilot project**. In my day-to-day work, I apply expertise in **automated testing, test case creation, performance testing, manual testing, business complexity analysis, coverage analysis**, in addition to **implementation of CI/CD pipelines** for functional validations. I also work across various modalities, such as **mobile testing, front-end testing, API testing, software quality, test automation** and **quality engineering**.
